2018 HAVA Security Grants Frequently Asked Questions

On Friday, March 23, 2018, President Donald J. Trump signed the FY2018 Omnibus Appropriations Bill into law. The bill made \$380 million in grants available to states to support election system upgrades that can strengthen election security. These grants, authorized under Title I Section 101 of the Help America Vote Act (HAVA) of 2002, mark the first new appropriations for HAVA grants since FY2010.

This much-needed funding will provide states with essential resources to secure and improve election systems. Below is additional information about the grants.

How much money is available and how much will each state be awarded?

The FY2018 Omnibus Appropriations Bill provides \$380 million to the U.S. Election Assistance Commission (EAC), as authorized under Title I Section 101 of the Help America Vote Act (HAVA) of 2002 (P.L. 107-252), to make grant payments to states using the voting age population formula described in Sections 101 and 103 of HAVA. A chart showing how much each state is being awarded can be found at <https://www.eac.gov/2018funding> and is attached to this document.

Who is eligible to receive funds?

Awards will be made to the entities eligible to receive federal assistance under Title I of HAVA, which includes the 50 states, the District of Columbia, the Commonwealth of Puerto Rico, Guam, American Samoa and the U.S. Virgin Islands (herein referred to as 'the states'). The states may re-grant/distribute funds to local election districts/offices at their discretion.

When will the funds be available for states to use?

States will receive grant award notification letters from the EAC by April 6, 2018. The letter will allow states to incur costs, with prior EAC approval, against the forthcoming grant awards, effective the date of the notification letter. Funds will be available for states to draw down and deposit in their state election accounts when they return signed grant documents and the required certifications and assurances.

What is the process for applying for funds?

The funds are available as formula, non-competitive grants. States will be required to submit a 2-3 page narrative overview of activities to be supported with the funds and a line item budget within 90 days of receiving their Notice of Grant Awards. Detailed guidance on development of the plans and budgets will be forthcoming. **Note that the awards will be issued and funds available for drawdown prior to receipt of the plan overview to expedite and support any needed expenditures ahead of the 2018 Election.**

Is there a state match requirement and when/how do states have to provide the match?

States must match 5 percent of the federal funds awarded within two years of receiving federal funds. States may either deposit matching funds in their state election accounts or track eligible funds/activities

from their state and local general operating budgets to meet the match obligations. State and local funds used for match must be different from funds used to meet Maintenance of Effort (MOE) or state match associated with HAVA Requirement Payments. American Samoa, Guam and the U.S. Virgin Islands are exempt from the match requirement.

What can the funds be used for?

States will determine how they will spend the money. Priority uses for funds provided by this Act include:

1. Purchasing voting systems that have verified paper records of the votes;
2. Implementing a post-election audit system that provides a high-level of confidence in the accuracy of the final vote tally;
3. Upgrading election-related computer systems to address cyber vulnerabilities identified through U.S. Department of Homeland Security (DHS) or similar scans or assessments of existing election systems;
4. Purchasing cyber security training for state and local election officials; and,
5. Implementing established cybersecurity best practices for election systems and other activities that will improve the security of elections for federal office.

Will the funds be available in time to impact the 2018 elections?

The EAC is committed to making funds available as soon as feasibly possible. How the funds will impact the 2018 elections will be entirely determined by how and at what pace states and localities deploy the federal resources.

What are the reporting requirements for states receiving funds?

States must provide an annual standard Federal Financial Report and program narrative for the period ending September 30, which is due by December 30 of the same year.

What if our state still has some HAVA funds remaining?

Any HAVA funds still remaining at the state level should be tracked and reported on separately from this new award. HAVA funds disbursed in earlier years are available for use until expended and have no impact on the amount awarded for this grant program.

Can funds be distributed if the EAC does not have a quorum?

Yes. A quorum is not needed to distribute funds to states.
